## WARNING

### WARNING

**This symbol means important instructions. Failure to heed them can result in serious injury or death.**

#### **DO NOT DISASSEMBLE OR ALTER.**

Doing so may result in an accident, fire or electric shock.

#### **KEEP SMALL OBJECTS SUCH AS BATTERIES OUT OF THE REACH OF CHILDREN.**

Swallowing them may result in serious injury. If swallowed, consult a physician immediately.

#### **USE ONLY IN CARS WITH A 12 VOLT NEGATIVE GROUND.**

(Check with your dealer if you are not sure.) Failure to do so may result in fire, etc.

#### **BEFORE WIRING, DISCONNECT THE CABLE FROM THE NEGATIVE BATTERY TERMINAL.**

Failure to do so may result in electric shock or injury due to electrical shorts.

#### **DO NOT SPLICE INTO ELECTRICAL CABLES.**

Never cut away cable insulation to supply power to other equipment. Doing so will exceed the current carrying capacity of the wire and result in fire or electric shock.

#### **DO NOT DAMAGE PIPE OR WIRING WHEN DRILLING HOLES.**

When drilling holes in the chassis for installation, take precautions so as not to contact, damage or obstruct pipes, fuel lines, tanks or electrical wiring. Failure to take such precautions may result in fire.

#### **DO NOT USE BOLTS OR NUTS IN THE BRAKE OR STEERING SYSTEMS TO MAKE GROUND CONNECTIONS.**

Bolts or nuts used for the brake or steering systems (or any other safety-related system), or tanks should NEVER be used for installations or ground connections. Using such parts could disable control of the vehicle and cause fire etc.

#### **DO NOT ALLOW CABLES TO BECOME ENTANGLED IN SURROUNDING OBJECTS.**

Arrange wiring and cables in compliance with the manual to prevent obstructions when driving. Cables or wiring that obstruct or hang up on places such as the steering wheel, shift lever, brake pedals, etc. can be extremely hazardous.

#### **USE THIS PRODUCT FOR MOBILE 12V APPLICATIONS.**

Use for other than its designed application may result in fire, electric shock or other injury.

#### **MAKE THE CORRECT CONNECTIONS.**

Failure to make the proper connections may result in fire or product damage.

### CAUTION

**This symbol means important instructions. Failure to heed them can result in injury or material property damage.**

#### **USE SPECIFIED ACCESSORY PARTS AND INSTALL THEM SECURELY.**

Be sure to use only the specified accessory parts. Use of other than designated parts may damage this unit internally or may not securely install the unit in place. This may cause parts to become loose resulting in hazards or product failure.

#### **DO NOT INSTALL IN LOCATIONS WITH HIGH MOISTURE OR DUST.**

Avoid installing the unit in locations with high incidence of moisture or dust. Moisture or dust that penetrates into this unit may result in product failure.

#### **HAVE THE WIRING AND INSTALLATION DONE BY EXPERTS.**

The wiring and installation of this unit requires special technical skill and experience. To ensure safety, always contact the dealer where you purchased this product to have the work done.

#### **ARRANGE THE WIRING SO IT IS NOT CRIMPED OR PINCHED BY A SHARP METAL EDGE.**

Route the cables and wiring away from moving parts (like the seat rails) or sharp or pointed edges. This will prevent crimping and damage to the wiring. If wiring passes through a hole in metal, use a rubber grommet to prevent the wire's insulation from being cut by the metal edge of the hole.

# Setup Before Using

## About BLUETOOTH

BLUETOOTH is a wireless technology allowing communication between a mobile device or personal computer over short distances. This enables a hands-free call or data transmission between BLUETOOTH compatible devices. BLUETOOTH transmission is available in the unlicensed 2.4 GHz spectrum if the distance between devices is within 10 meters. For details, refer to the BLUETOOTH Homepage (<http://www.bluetooth.com/>).

- Depending on the BLUETOOTH version, a BLUETOOTH compatible device may not be able to communicate with this adapter.
- Proper function of this adapter with all BLUETOOTH compatible devices is not guaranteed. For handling of the BT compatible device, consult your ALPINE dealer or ALPINE website.
- Depending on the surroundings, BLUETOOTH wireless connection may be unstable.
- When you place a call, or perform setup operations, be sure to stop your car in a safe place.
- For details on the control (selection, enter, cancel) from the connected unit, refer to the Owner's Manual of the respective unit.
- Depending on the connected BLUETOOTH compatible device(s), the function may differ. Also refer to the Owner's Manual of the connected device(s).

## Before Using Hands-Free Function

Before using the hands-free phone function, the following settings need to be made.

- 1 Be sure to set "INT MUTE" (in the setup function of the connected CD Head Unit or Digital Media Receiver) to OFF.**
  - To enable sound pass-through of the BLUETOOTH compatible device, make sure that INT MUTE is turned OFF (Initial setting on the unit is OFF).
- 2 Set "BLUETOOTH IN" (BT IN) to Adapter (ADPT) or HFP\*. (Refer to the Owner's Manual of the connected units.)**
- 3 Turn the ignition key off (ACC OFF) and on again (ACC ON).**
  - Before using a hands-free phone, it must be paired with the adapter. Refer to "BLUETOOTH SETUP" (pages 4-6).
  - If "BLUETOOTH IN" (BT IN) setting is turned OFF at any time, adapter communication is canceled. To resume communication: repeat Steps 1 through 3 above.

\* Depending on the head unit, the "BLUETOOTH IN (BT IN) setting" may differ.

Refer to the following head unit types:

### Type 1 <"Adapter" is displayed as a selection>

Adapter (ADPT):

This option allows the head unit to recognize connection with this adapter. (Hands-free Phone is available, and the BT Audio source can be displayed, but cannot be used.)

Off: This option does not allow the head unit to recognize connection with this adapter.

### Type 2 <"Adapter" is not displayed as a selection>

HFP: This option allows the head unit to recognize connection with this adapter. (Hands-free Phone is available, but the BT Audio source is not displayed.)

HFP+Audio (+AUDIO):

BT Audio is not available with the adapter, so please do not select this option.

Off: This option does not allow the head unit to recognize connection with this adapter.

## How to connect to a BLUETOOTH compatible device (Pairing)

Refer to the Owner's Manual of your BLUETOOTH compatible device for details on its operation.

- 1 Set a BLUETOOTH connection from a BLUETOOTH compatible device.**
- 2 The PIN code ("0000") is displayed on the connected unit.**
  - The PIN code is fixed as "0000".
- 3 Input the PIN code ("0000") in a BLUETOOTH compatible device.**
- 4 If the connected unit is successfully paired to a BLUETOOTH compatible device, a paired device name is displayed on the unit, and then the unit returns to normal mode.**
  - If a BLUETOOTH compatible device is successfully paired, the next time the vehicle's ignition is turned on, pairing is done automatically. Should the automatic pairing fail, repeat the steps above.
  - Set "Setting the Search Mode" (page 5) to ON to enable the KCE-250BT to be recognized by a mobile phone. For mobile phone passkey (passcode) input operation, refer to the mobile's Owner's Manual. Additionally, the mobile phone can be searched directly from an AV Head Unit. Refer to "Registering the BLUETOOTH Device (AV Head Unit only)" (page 5).

# Hands-Free Phone Control

## About the Hands-Free Phone

Hands-free calls are possible when using a HSP (Head Set Profile) and HFP (Hands-Free Profile) compatible mobile phone with a ALPINE BLUETOOTH compatible CD Head Unit, AV Head Unit or Digital Media Receiver.

- Avoid performing a hands-free call in heavy traffic or on narrow or winding streets.
  - Close the windows while calling to reduce background noise.
  - If both calling parties are using hands-free devices, or the call is made in a noisy location, difficulty hearing the other person's voice is normal.
  - Depending on telephone line conditions or certain mobile devices used, voices may sound unnatural.
  - When using a microphone, speak as directly as you can into the microphone to pick up the best sound quality.
  - Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or the provider's network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality.
- All features, functionality, and other product specifications, as well as the information contained in the Owner's Manual are based upon the latest available information and are believed to be accurate at the time of printing. Alpine reserves the right to change or modify any information or specifications without notice or obligation.*

- You may need to increase volume from your regular audio listening source level. However, increasing the volume excessively may result in feedback. If feedback is noticed as feedback is directly related to the volume, turn down the volume as low as acceptable to eliminate it. Positioning the microphone in a direction away from the main car speakers (e.g. clipped on sun visor) may also reduce feedback at high volume.

# Installation

## Velcro fastener Mounting

For the sake of safety, follow the guidelines below in choosing the mounting location.

- Do not mount the adapter under your feet. Do not step on the adapter, or apply excessive pressure on it.
- Before mounting the adapter, leave enough space above the unit to prevent possible malfunction due to radiated data noise.
- Depending on the adapter mounting location noise may occur when using a BLUETOOTH compatible device. This may cause interference resulting in errors in the BLUETOOTH data being sent or received. Should this happen, the BLUETOOTH device may have problems in pairing or functioning normally. In this case, mount the adapter in another location.

### Attach one side of the Velcro fastener to the box.

Remove the backing from the other side of the Velcro strip. Gently press the adapter onto its selected mounting location.

## Mounting the Microphone

For the sake of safety, mount the microphone in the following location.

- In a stable and secure location.
- In a location that does not inhibit safely driving the vehicle.
- Mount the microphone in a location where the driver's voice can easily be picked up.

Choose a location for the microphone that can easily pick up the drivers voice. Requiring the driver to move towards the mic for audibility causes a distraction that could be dangerous.

**Mount the microphone using the supplied Velcro fastener or the bracket.**
